#### **Discussion items for the August 27 meeting included:**

- 1) Review and edit of the Final DRAFT IP-Based Interactive Communications Template document.
- 2) Review and edit Exhibits A & B showing separate and unified systems.

The group reviewed the Final DRAFT Template document and:  
a. Discussed and tweaked wording.

- b. Added to and affirmed “Deficiencies That Are in Place.” Decided to create a separate chart, Exhibit B, to support how these deficiencies impact current separate systems/silos.

The group reviewed and edited Exhibit A (barriers) and C (future) (formerly Exhibit B) and:

- a. It was suggested that the “black lines be blurred” for the Exhibit C showing unified systems.
  - b. Wording was tweaked to reflect generic applications rather than specific brands.
- 3) Others – The group’s work will be presented September 19 at a public meeting including ITC, Subcommittee members, and the public. We will present our work group reports and answer questions from ITC and the public.
